

Conflict Minerals Statement

Megacon Group and its employees are concerned about the use of natural resources to fund the armed conflict in the Democratic Republic of Congo (DRC) and adjoining countries.

Minerals mined in the regions include gold (AU), tantalum (Ta), tungsten (W) and tin (Sn) which are indispensable to electrical and electronic industries.

Profits from the mining of these minerals have resulted in increased hostilities and human rights violations in the region.

Megacon Group works closely with all of our suppliers to ensure that to the best of our knowledge we are not distributing any products that contain "Conflict Minerals" or products which use "conflict minerals" in their manufacturing processes.

We give careful consideration to suppliers and materials from the very first design brief for all new products. All of our major suppliers are expected to provide details of how they demonstrate due diligence in the maintenance of a "conflict mineral" free chain. All suppliers are informed that by agreeing to supply us they agree to supply goods which do not use any raw materials in their manufacture that are defined as conflict materials.

Megacon Group is committed to ethical practices and full compliance with all applicable laws and regulations
